system  
euro LT

The Classic Euro LT system represents cutting edge technology in lightweight modular engineering. LT's components, corners and accessories are engineered to provide maximum strength and versatility with minimum weight and cost for a custom looking appearance. A full complement of flat and curved panels, corner angles and connector configurations, are also available in door, window, and lightbox construction to meet virtually any design specification.

LT is an outstanding alternative to custom-crafted exhibits. Compared to a custom exhibit, LT is much lighter, costs less to ship, offers more versatility, and is generally less expensive.

#### BENEFITS

- Concealed slide clip connecting system
- Engineering grade molded connecting parts
- Panel aligning locks
- Exclusive perfect curve construction
- Fluorescent backlighting
- Breakdown large format lightboxes
- Fabric and laminate finishes
- Molded transport cases and crates
- Design, quoting and rendering support

#### FEATURES

— Lexan slide connectors

Concealed panel locks —
