

classic exhibits

Classic Exhibits desire to be different has been a powerful motivation

to drive us toward greater innovation in the trade show industry. ■

More functionality like a two sided panel that is also multidirectional

■ More structure while having the industries lightest weight panel

■ More forethought like no loose stacking pins or shims to level

your booth ■ More security like double wall rotomolded, side

loading cases that can be jiggged out to withstand the most torturous

handling ■ More ingenuity like a self locking panel for greater leveling

ability ■ More custom options, like the ability to design as though you

were building a custom exhibit but with the simplicity of assembly that

characterizes a Classic. ■ The Euro LT is Classic's portable modular

lamine system for those who feel that image is everything!

Never underestimate the power of a classic.

euro LT systems

The portable modular laminate system that really screams "custom". There's nothing portable looking about the LT System. Its large sweeping curves and custom elements offer infinite design options which set you apart from your competitors. Why look ordinary when you can have the "industry leader" image! Let our design department help create the look and feel that supports your image to market program.

- User friendly connection system
- No sharp edges
- No small parts or tools
- Easiest panel lock in the industry
- Variety of panel sizes
- Portable cases for ease of shipping
- Large tubs for shipping major jobs
- Tongue in groove stacking system
- Complete complement of accessories for all needs
- Truest curves in the industry
- Flawless seams
- Truly light weight

gallery

Whether you need a 10 foot in-line exhibit or a large island exhibit, you can capture the elegance of true professionalism through creative design.

packaging

Classic's "double walled" rotomolded cases keep contents safe from the normal jostling, and sometimes not so normal banging around, incurred during shipping. Small cases are also available for more portable needs.

LT slide connectors are identical except for color—not male and female like most others. This feature allows you to set-up your exhibit from right to left, left to right or from the center out.
