

AERO

Using Your Setup Instructions

The Aero Overhead Sign Setup Instructions are created specifically for your configuration. They include an exploded view of the frame which is sequentially numbered. We encourage you to study the instructions before attempting to assemble your exhibit.

Connections are kept very simple: no tools. Everything assembles with push-button connectors and pre-connected horizontal sections.

Cleaning and Packing Your Display

- 1) Use care when cleaning aluminum extrusion or acrylic inserts. Use only non-abrasive cleaners.
- 2) Retain all packing material. It will make re-packing much easier and will reduce the likelihood of shipping damage.

Connections are made by holding the button down and sliding the red tube into opposing tube until the connection is made. To disassemble push button and pull or twist extrusions apart.

Steps

- 1) Connect all pieces together in numerical order.
- 2) After assembling lower and upper sections, connect them using the 6 Straight Vertical supports and 3 Curved Vertical supports.
- 3) Connect assembled pinwheel to custom plate using 3 Straight Horizontals.

Item	Qty.	Description
1	1	Base Plate
2	1	30.25"h Lower Vertical Extrusion
3	1	30.25"h Upper Vertical Extrusion
4	1	Upper Plate

Steps:

- 1) Attach vertical extrusion [2] to base plate [1].
- 2) Attach upper vertical extrusion [3] to lower vertical extrusion [2].
- 3) Attach upper plate to vertical extrusions [3/4].
- 4) Attach rotating motor to top of assembled support pole.
- 5) Attach assembled pinwheel aero structure atop rotating motor.

visionary™ DESIGNS

Using Your Setup Instructions

The Visionary Designs Setup Instructions are created specifically for your configuration. They are laid out sequentially, including an exploded view of the entire display, and then a logical series of detailed steps to assemble the main structure and components. We encourage you to study the instructions **before** attempting to assemble your exhibit.

Each page reminds you to tighten the setscrews after disassembling your exhibit to prevent loss of the locks and setscrews (see below in RED). This is VERY IMPORTANT.

Cleaning and Packing Your Display

- 1) Use care when cleaning aluminum extrusion or acrylic inserts. Use only non-abrasive cleaners.
- 2) When cleaning laminate inserts or countertops, use mild cleansers and a soft material such as cotton.
- 3) Keep all display components away from extreme heat and long exposure to sunlight to avoid warping and fading.
- 4) Retain all packing material. It will make re-packing much easier and will reduce the likelihood of shipping damage.

Most Visionary Designs exhibits can be assembled with the supplied Hex Key Tool. Occasionally, a flat head screwdriver may be required.

Most horizontal extrusion connections have a patented expandable lock. This lock inserts into the groove of an opposing extrusion. Tightening the lock with the Hex Key Tool expands the lock and creates a strong positive connection.

Each extrusion contains a numbered label which corresponds with setup instructions. The label is located within a groove of the extrusion (when possible). With Visionary Designs the labels contain Black numbers unless otherwise specified.

Remove only (1) setscrew when disassembling. Replace setscrew in extrusion after assembling it. Before packing, replace setscrew in extrusion to avoid losing it.

Attach base plate to round or square vertical extrusion using the bolt provided. Be careful not to strip the threads.

When vertical extrusions are packed in portable cases rather than crates or tubs, they must be broken down into smaller sections which then require assembly.

Remove only (2) setscrews when disassembling. Replace setscrews in extrusion after assembling it. Before packing, replace setscrews in extrusion to avoid losing them.

NOTE :

PDF copies of your Setup Instructions are available @ www.classicexhibits.com
Use the Search Tool located on the lower left-hand corner of the Classic Home page.

Enter your 5-7 digit Order #.
