## General Setup Instructions

### Using Your Setup Instructions

The Setup Instructions are created specifically for your configuration. They are laid out sequentially in levels, including exploded views, and a logical series of detailed steps to assemble the main structure and components. We encourage you to study the instructions **before** attempting to assemble your exhibit.

Each page reminds you to tighten the setscrews after disassembling your exhibit to prevent loss of the locks and setscrews (see below in RED). This is **VERY IMPORTANT**.

### Cleaning and Packing Your Display

- 1) Use care when cleaning aluminum extrusion or Eco Glass inserts. Use only non-abrasive cleaners.
- 2) When cleaning laminate inserts, countertops, or panels use mild cleansers and a soft material such as cotton.
- 3) Keep all display components away from extreme heat and long exposure to sunlight to avoid warping and fading.
- 4) Retain all packing material. It will make re-packing much easier and will reduce the likelihood of shipping damage. Each Layer will be labeled with the packing order.

## General Setup Instructions for Panel System

Each component has 2 clips, the lower clip is ALWAYS black. The top clip is color coded to distinguish the level. The color coded clip also contains the numbered label.

Cut Away View Of Slide Clips

Components connect together by aligning them and sliding downward connecting clips together.

Example of Connection

Configurations are assembled from left to right, usually starting with #1 and following the numbered sequence.

Top View of Panels with Locks

The first level of components contains panel locks that are located at the top of the panel for extra stability and a seamless connection. When disassembling panels, twist top connection slightly and lift right panel upward.

## General Setup Instructions for Extrusion System

The Tool

Most exhibits can be assembled with the supplied Hex Key Tool. Occasionally, other tools may be needed.

Typical Connection

Most horizontal extrusion connections have a patented expandable lock. This lock inserts into the groove of an opposing extrusion. Tightening the lock with the Hex Key Tool expands the lock and creates a strong positive connection.

Typical Connection (cont'd)

Numbered Label

Each extrusion contains a numbered label which corresponds with setup instructions. The label is located within a groove of the extrusion (when possible). With extrusion components the labels contain Black numbers unless otherwise specified.

Horizontal Inline Connection (remove only one setscrew)

Remove only (1) setscrew when disassembling. Replace setscrew in extrusion after assembling it. Before packing, replace setscrew in extrusion to avoid losing it.

Base Plate Connection

Attach base plate to vertical extrusion using the lock provided. Place base plate on ground and set vertical post/lock in base plate slot. Tighten lock with Multi-tool.

Vertical Connection (remove only two setscrews)

When vertical extrusions are packed in portable cases rather than crates or tubs, they must be broken down into smaller sections which then require assembly.

Remove only (2) setscrews when disassembling. Replace setscrews in extrusion after assembling it. Before packing, replace setscrews in extrusion to avoid losing them.

Item Number	Qty.	Description
1	3	Base Plate
2	1	47" h Vertical Extrusion
3	1	47" h Vertical Extrusion
5	1	47" h Vertical Extrusion
6	1	47" h Vertical Extrusion
7	1	34.364" h Vertical Extrusion
9	1	47" h Vertical Extrusion
10	2	47" h Horizontal Extrusion
12	1	Curved Horizontal Extrusion
13	1	Curved Horizontal Extrusion

Steps:

- 1) Lock vertical extrusions [2,3,5] to base plates [1] as shown in detail on general information page.
- 2) Connect vertical extrusions [6,7,9] to vertical extrusions [2,3,5] as shown.
- 3) Connect horizontal extrusions [10] between lower verticals as shown.
- 4) Connect horizontal extrusions [12,13] between upper verticals as shown.

*Note: Attaching Graphics*

Attach Backwall Graphics to Velcro on the Top Edge of the Upper Horizontals and on the Bottom Edge of the Lower Horizontals

Steps:

- 1) Attach wings as shown. Secure with A10 clamps by tightening the plastic screws.  
Do not remove A10 clamps. Keep attached when packing.
- 2) Attach graphic to velcro at the top of the center vertical extrusions.
- 3) Attach literature racks according to detail.

*Note: Attaching Graphics*

Attach Backwall Graphics to Velcro on the Top Edge of the Upper Horizontals and on the Bottom Edge of the Lower Horizontals

Slide edge into channel of vertical extrusion.

**\* Literature Rack Attachment**

Tighten Lock to Secure

Attach connector piece to rack as shown. Then connect assembled literature rack to vertical extrusion.

**Example of A10 Clamp Attachment**

Slide connector on back of A10 clamp into groove of extrusion.

When desired location is found, tighten set screw to secure.

Tighten knob to secure shelf/wing in place.

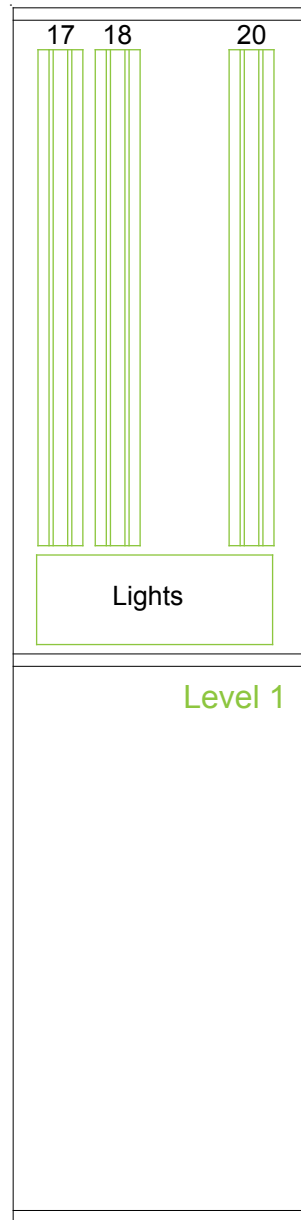

Part #	Qty	Description
17	1	Square Vertical Post
18	1	Square Vertical Post
19	1	Small Square Vertical Post
20	1	Square Vertical Post
21	2	Curved Horizontal Extrusion
22	2	Horizontal Extrusion
23	2	Curved Horizontal Extrusion

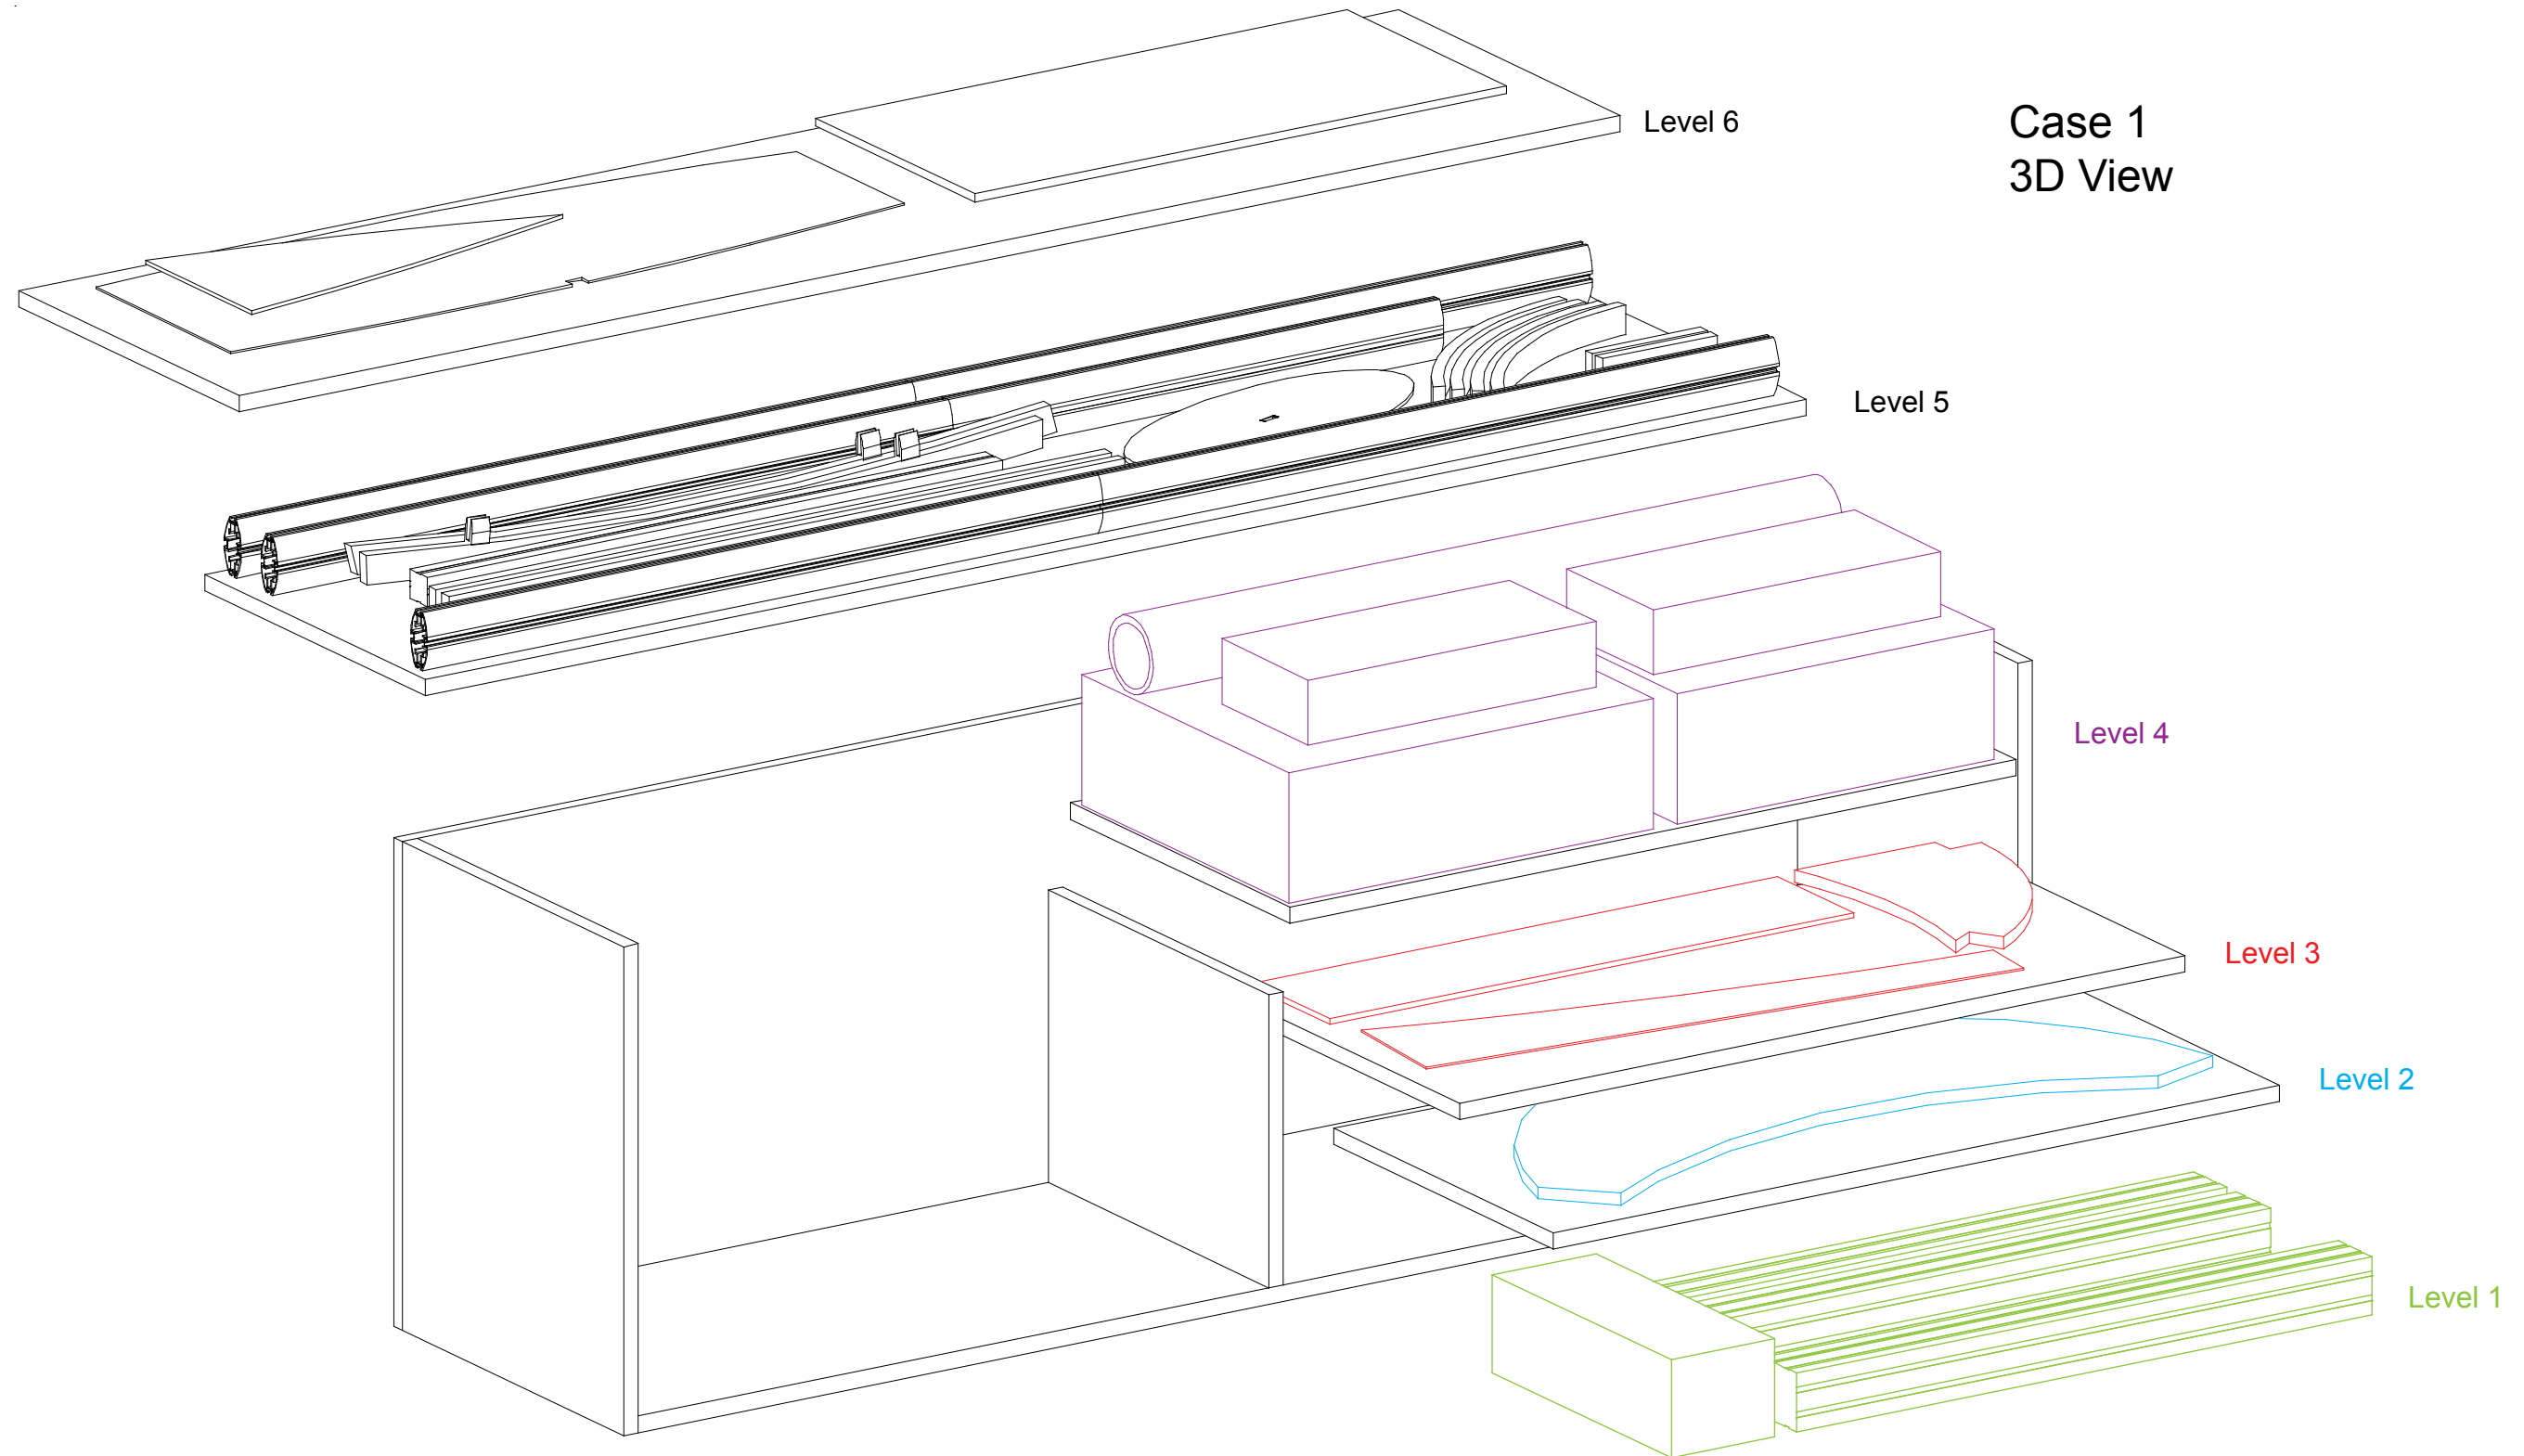

**Steps**

- 1 - Attach vertical extrusions [17,18,19,20] and lower horizontals [21,22,23] as shown.
- 2 - Slide Infills as shown and connect upper horizontals [21,22,23].
- 3 - Place shelf on pins attached to legs and set counter atop pedestal.
